About MSI Reproductive Choices

MSI Reproductive Choices is one of the world's leading providers of sexual and reproductive healthcare. We believe that everyone should have the right to choose. From contraception to safe abortion and life-saving post-abortion care, we are committed to delivering compassionate, affordable, high-quality services for all.

Today, our organisation has over 9,000 team members working in 37 countries across the world. Our success lies in the fact that MSI teams are locally led, entrepreneurial and results-driven, and are passionate about delivering high quality, client-centred care in their own communities. As a social business, we focus on sustainable delivery, efficiency, and funding models that are built to last, so that the women and girls we serve today will have a choice in the future too.

We know that access to reproductive choice is life changing. For some, it can mean the ability to complete an education or start a career. For others, it means being able to look after the family they already have. For everyone, it means the freedom to decide their own future, creating a fairer, more equal world.

MSI Madagascar's services include all modern methods of contraception and post-abortion care following an unsafe abortion, as well as maternal and child health services, cervical cancer screening and treatment and testing of sexually transmitted infections (STIs). For the next decade, MSI Madagascar's focus will be on health services related to women's "life cycle", from menstruation to menopause.

MSI Madagascar works closely with the Ministry of Public Health and reaffirmed its commitment to strengthening the health system and ensuring universal coverage of maternal and reproductive care, in line with the integrated FP strategic plan SPSR 2021-2025, and the PF2030 programme. Respectively, they aim to achieve a modern contraceptive prevalence rate of at least 52% by the end of 2025 and 60% by the end of 2030. To achieve this goal, MSI Madagascar partners with numerous local associations led
